

Mission Statement

L.E.A.D Uganda: LOCATE EDUCATE ACHIEVE DREAM

L.E.A.D Uganda locates forgotten children, educates them, and helps them achieve their dreams.

L.E.A.D Uganda is an educational leadership initiative for abandoned children affected by AIDS, war, and poverty. We give hope to children who had no future.

LOCATE

We locate the best and the brightest children living on the edges of society - AIDS orphans, former child soldiers, child laborers. We mold them into leaders.

EDUCATE

We educate our orphans in very best primary and secondary schools – where cabinet ministers send their children. We furnish them with everything they need to succeed: school fees, books and supplies, clothing, and food. Our children receive medical care from the best doctors in the country. During school breaks, our students receive coaching in English, math, and science. They attend workshops in leadership, web design, writing, video, and photography.

L.E.A.D Uganda is a family to our children. We give our youngsters a disciplined, loving family environment. Our professional staff and volunteers nurture them and help them overcome their traumas with counseling and emotional support. We imbue the children with a strong work ethic and a desire to serve.

ACHIEVE

Our students achieve academic excellence. Our scholars receive scholarships to top universities in Uganda, India, and the United States. Because of this, our children are transformed into leaders: entrepreneurs, teachers, doctors. Instead of remaining victims, they will be able to lead Africa into the 21st Century.

DREAM

Our children dream of helping Africa. L.E.A.D Uganda gives our scholars the world-class social, entrepreneurial, and communication skills, as well as, the confidence, necessary to lead their countries into the future

Our Model Works

L.E.A.D Uganda is no ordinary program. Our intense, capacity building model helps children heal and achieve. L.E.A.D Uganda provides a vision, a road map of how we can alleviate poverty and create a safer world.
